SOIL CONDITIONER AND SEMI-COARSE MULCH IN ONE

Combining the benefits of both Jeffries Organic Compost and Jeffries Dura Mulch, expect to see benefits for several years.

MADE FROM

Composted recycled organics collected from diverse sources, providing a high level of microbial diversity as it breaks down (unlike single-source mulches and manures).

Jeffries Rustic Choice goes through the same intensive composting system and world-renowned ROSS plant as Jeffries Organic Compost and Jeffries Dura Mulch.

Due to its uniform mid-range particle size, Jeffries Rustic Choice can contain a higher level of inorganic material than our other compost and mulches, including the occasional stone, glass or plastic fragment. This does not affect the performance of the mulch in any way.

KEY BENEFITS

- Significantly increases water retention
- Suppresses weeds
- Insulates soil from temperature extremes
- Medium to long-term durability 2-5 years
- In-stock and ready to go
- An economical soil protection solution
- Slow release of organic nutrients

CROP	REGION	APPLICATION RATE	FREQUENCY
Vines (incl table grapes)	Sunraysia, Adelaide Hills, Langhorne Creek, Barossa, Clare Valley, Riverland & McLaren Vale	100 -150m ³ per hectare	2-5 years
