WHY CHOOSE US FOR YOUR LANDSCAPING PROJECT?

CERTIFICATIONS

As a business, Jeffries is certified to Australian Standard Quality Management Systems ISO 9001. Jeffries are consistently monitoring and managing quality across all operations to ensure we supply premium products and services for our customers.

Many of Jeffries Manufactured Products are certified to the Australian Standard and National Association for Sustainable Agriculture Australia (NASAA). This guarantees you and your client consistent product quality, making Jeffries the best choice for upcoming projects.

JEFFRIES ORGANIC COMPOST

Jeffries Organic Compost is the perfect natural soil conditioner. Combining Jeffries Organic Compost into pre-existing soil will promote healthy soil and encourage stronger plants and root growth. Jeffries Organic Compost is Certified to Australian Standard 4454 and NASAA Standard 5125M.

KEY BENEFITS

- Increases organic carbon in soil
- Improves aeration and water infiltration
- Increase nutrient uptake by plant roots
- Helps keep soil temperatures constant
- Certified to Australian Standard
- NASAA Certified Input for Organic Production

USE

- As a soil improver/conditioner
- Mix into existing soil to boost organic matter
- For sites with nutrient depleted soils
- For sites with sandy or clay based soil
- If soil struggles to retain moisture

SOIL

JEFFRIES SPECIAL SOIL

Jeffries Special Soil has been developed with landscapers in mind. Jeffries Special Soil provides an open, free draining soil structure, whilst containing vital organic matter.

KEY BENEFITS

- Rich in organic matter, providing a gradual release of nutrients
- Suitable for large projects
- Suitable for phosphorous sensitive plants
- Improved soil structure allowing better water infiltration and increased soil aeration
- Improved moisture holding capacity
- Certified to Australian Standards

USE

- Use in place of standard sandy loam when increased organic matter is required
- Sites where topsoil has been depleted or removed
- To establish new beds or top up existing ones
- Underneath new instant lawn (not recommended as a lawn top dressing)
- Cost effective solution for large scale projects

MADE FROM...

a consistent and even blend of ingredients including sandy loam, course washed sand and blended with Jeffries Organic Compost to make the soil rich in organic matter.

INCLUDES
GYPSUM

QUALITY ASSURANCE - JEFFRIES SPECIAL SOIL IS THE ONLY SOIL MANUFACTURED IN SOUTH AUSTRALIA THAT IS CERTIFIED TO AUSTRALIA STANDARD 4419.

This ensures you and your clients are using the highest quality of soil available

JEFFRIES VEGGIE & GARDEN SOIL

Jeffries Veggie & Garden Soil consists of a blend including Jeffries Organic Compost, resulting in a high level of organic matter. With an open, free draining structure, the soil resists compaction making it ideal for raised garden beds.

KEY BENEFITS

- A premium soil with a high level of organic matter
- An open structure, free draining soil that resists compaction
- Added blood and bone
- NASAA Certified Input for Organic Production

USE

- Ideal for raised garden beds
- Large planter boxes or large tubs

JEFFRIES HYDROCELL SOIL

Jeffries Hydrocell Soil is a specially formulated lightweight mix including the unique growing medium Hydrocell™. The unique foam-like structure of Hydrocell, can hold water, air and nutrients for plant roots to access.

Hydrocell reduces compaction within the root zone by simply creating more air space, making Jeffries Hydrocell Soil ideal for planter boxes and tubs that are prone to compaction.

KEY BENEFITS

- Holds water, nutrients and air for plant roots to access
- A lightweight mix with the added benefits of Hydrocell
- Hydrocell lasts for up to 7 years in the soil profile and is replaced with root volume over time

USE

- When a lightweight soil is specified
- Ideal for rooftop and vertical gardens
- A project requires extra water retention and structure

COMMERCIAL MULCH

LONG
LASTING

JEFFRIES LANDSCAPERS CHOICE

Jeffries Landscapers Choice range has been specifically formulated for use by landscapers. Jeffries Landscapers Choice is a durable mulch which enriches the soil beneath with carbon as it slowly breaks down. Its coarse and long-lasting nature makes it a cost-effective solution for large scale commercial projects.

KEY BENEFITS

- Good matting properties, helping to prevent movement on slopes
- Suppresses weed growth and reduces soil erosion
- Long lasting and cost effective solution

USE

- Commercial graded product, where a cost effective long lasting mulch is needed
- Sloped sites

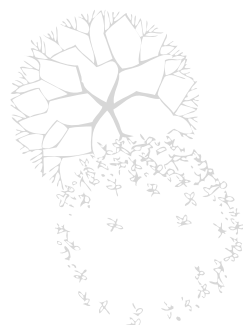

COARSE

MEDIUM

PREMIUM MULCH

JEFFRIES FOREST MULCH

Jeffries Forest Mulch is a premium fine grade mulch which contains increased organic matter to aid with the conditioning soil. Jeffries Forest Mulch is certified to Australian Standard 4454 and NASAA standard 5125M ensuring a clean and consistent high-quality product for you and your clients.

KEY BENEFITS

- Fine and natural looking mulch
- Contains vital organic matter to improve soil fertility and structure
- Certified to Australian Standards ensuring a consistent, high-quality product

USE

- When you require a mulch that conditions your soil
- When a fine mulch is specified

FINE
GRADE

JEFFRIES GARDENERS CHOICE MULCH

Jeffries Gardeners Choice Mulch is a medium grade, natural-looking composted mulch designed to condition your soil.

KEY BENEFITS

- Clean natural looking mulch
- Improves water retention and insulates plants against extreme temperature fluctuations
- Minimal fines to allow for maximum water penetration

USE

- For projects that require a refined natural finish

CLEAN
NATURAL
FINISH

JEFFRIES RECOVER MULCH

Jeffries Recover Mulch is a dark, medium grade mulch, boosted with Blood and Bone. A complete soil conditioning mulch providing key nutrients that promote healthy plant growth.

KEY BENEFITS

- Added Blood and Bone and gypsum, a complete soil conditioning mulch
- Includes key nutrients Nitrogen, Phosphorous and Calcium, which are slowly released into the soil
- Improves water retention and insulates plants against temperature fluctuations

USE

- When a soil conditioning mulch is required
- For established gardens where digging in compost to the soil may be difficult

ADDED
BLOOD & BONE
& GYPSUM

DESIGNER MULCH

JEFFRIES FOREVER RANGE IS A DECORATIVE MULCH DESIGNED TO GIVE ANY PROJECT AN INSTANT MAKEOVER. JEFFRIES FOREVER RANGE IS DYED WITH AN ENVIRONMENTALLY FRIENDLY COLOURANT WHICH LOCKS IN VIBRANCE

SAFE FOR THE ENVIRONMENT, KIDS & PETS

JEFFRIES FOREVER MULCH RANGE

KEY BENEFITS

- High quality designer mulch
- Easy to spread
- Long lasting colour that is safe for kids, pets and plants
- Suppresses weed growth
- Insulates plants and improves water

USE

- As decorative mulch
- To add a dynamic contrast to a landscape project
- As a high quality recycled timber alternative to pine bark

INSIST ON AUSTRALIAN STANDARD CERTIFICATION FOR YOUR NEXT PROJECT

If a product is said to 'comply' with a Standard, it means that the manufacturer has not undergone compulsory third party testing to confirm that their product meets the requirements of Australian Standard 4422.

Jeffries PlayScape has been 'certified to' Australian Standard 4422. This means that our product has been specifically tested under the supervision of a third party, and we have been granted the product conformance mark. Most importantly, Jeffries PlayScape is strictly and continually assessed for its ongoing ability to meet Australian Standard 4422.

Giving you and your client the assurance that you are using the highest quality and safest softfall available.

YOUR GUARANTEE OF QUALITY

SOFTFALL

JEFFRIES Playscape™

The only Australian Standard certified loose fill softfall manufactured in South Australia!

Jeffries Playscape is the only loose fill softfall manufactured in South Australia certified to Australian Standard AS 4422 LIC 2207. This certification ensures that you have surfaced a playground with the safest softfall available.

Jeffries Playscape is made from raw pine material sourced from sustainable manufacturers across South Australia, graded for playground surfacing.

KEY BENEFITS

- Certified to Australian Standards making sure you stay compliant
- Non-toxic
- Provides cushioning from falls and protects against abrasion
- Suppresses weed growth

USE

- Outdoor play and activity areas
- Horse arenas and round yards
- When a certified Softfall is specified

jeffries® PowerScaper™

Save time. Increase productivity.

Jeffries PowerScaper operates by blowing product efficiently and effectively, saving our customers valuable time and labour whilst improving work health and safety. Jeffries PowerScaper is ideal for landscape projects with difficult site access or those with time restrictions. Jeffries PowerScaper can make quick work of your next landscaping project, whether it is a small residential job or a major infrastructure project

**IDEAL FOR
PROJECTS WITH
DIFFICULT SITE
ACCESS OR TIGHT
SCHEDULE**

FARTHER AND FASTER

Jeffries PowerScaper can install up to 2000m² per day. With each truckload equivalent to 79 trailer loads or 510 wheelbarrow loads. Let the Jeffries PowerScaper assist with landscaping projects to half the amount of time and energy spent.

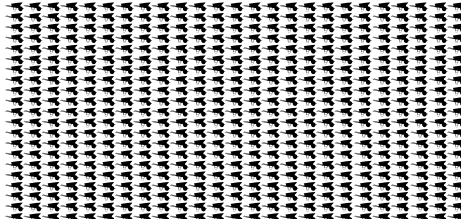

1 Jeffries PowerScaper™

= 79 trailer loads

or 510 wheelbarrow loads

IDEAL PROJECTS

DIFFICULT ACCESS

Here at Jeffries we love a challenge. Jeffries PowerScaper is great at working with logistically challenging sites. With its extended hose reach, Jeffries PowerScaper can deliver product up to 80 metres from the truck.

SLOPED SITES

Sloped sites are a common challenge faced by landscapers as these sites can be unsafe and difficult to manually handle product. Jeffries Powerscaper can efficiently access sloped areas from a distance, ensuring safe installation of product.

DELICATE LANDSCAPES

With no heavy equipment to damage your landscape it is ideal for delicate areas with existing landscaping and plants. The inbuilt dust suppression and hose some distance away from the trucks means noise and local disturbance is kept to a minimum.

PLAYGROUNDS

Jeffries PowerScaper is the perfect partner to spread Jeffries PlayScope (certified softfall) around playgrounds.

Working around existing play equipment with ease, this speed allows you to get in and out quickly minimising disruption to children's play time.

THE RIGHT
BLEND THE
FIRST TIME

CUSTOM BLENDING

We can custom blend a compost, soil or mulch to your specifications.

Need a structural soil blend for planting trees in a streetscape? Or maybe a lightweight soil blend for a rooftop garden?

Simply provide Jeffries with the amendments and quantities and we can blend it with one of our products. Jeffries can source and supply a range of amendments or you can source your own specialised amendment.

ROYAL ADELAIDE HOSPITAL

Custom Blended Soil and Mulch

The new Royal Adelaide Hospital has numerous internal and external gardens.

Two custom soil blends were specified by the landscape architects and were used in raised garden beds throughout the site.

The various garden beds were finished in Jeffries Forever Black Mulch to lend a clean and elegant finish, offering a high contrast to the foliage.

BULKA BAGS

Jeffries compost, soil and mulch are available to be delivered in bulka bags. A bulka bag is a large lightweight bag with one tonne or one cubic metre capacity. This allows for Jeffries compost, soil and mulch to be craned on to projects with restricted access, such as rooftop gardens and floors above ground.
