

PROJECT

BLUE TONGUE CREEK

PROJECT WITH OVERLAND FLOW ISSUES

This project required a mulch suitable for an incline that was easy to install and didn't wash away or drift down into the creek riparian zone or creek bed.

Jeffries Landscaper Choice Medium was the perfect solution for sloped surfaces due to its ability to matt and meld, preventing movement, yet allowing rainwater to percolate. It also looks great along pathways.

Jeffries PowerScaper can install up to 2000 m3 per day with up to 100m of hose.

PRODUCT

Jeffries Landscapers Choice Medium

LOCATION
