

PROJECT

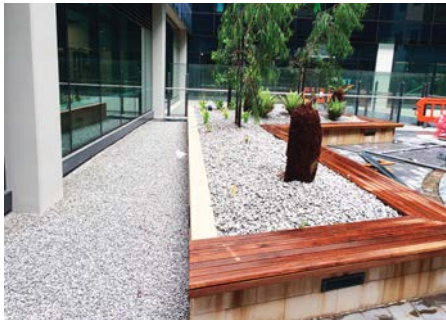

ROYAL ADELAIDE HOSPITAL CUSTOM BLENDED SOIL AND MULCH

Jeffries supplied approximately 2000m³ of custom blended soil and mulch and delivered in 1500 Bulka Bags.

The new Royal Adelaide Hospital has numerous internal and external gardens. Custom soil blends specified by the Landscape Architects were used in raised garden beds throughout the site. Jeffries were thrilled to be the primary supplier of two custom soil blends and Forever Black Mulch for both internal and external gardens.

A key component for being chosen as the preferred supplier was Jeffries Australian Certification of its Organic Compost, Soil and Mulch.

The Light Weight Podium Mix included a blend of Jeffries Organic Compost, Hydrocell, Special Soil and slow release fertiliser. The mulch used in the external garden beds, Jeffries Forever Black, lends a clean and elegant finish to a garden bed, offering a high contrast with foliage of all colours.

Jeffries PowerScaper can install up to 2000 m³ per day with up to 100m of hose.

PRODUCT

Jeffries Light Weight
