

Jeffries Organic Potting Soil*

A quality organic growing medium Jeffries Organic Potting Soil* is the perfect blend of organic nutrients to establish healthy plants and stimulate growth, and is certified for organic production.

USE

- In place of a regular potting mix when you want to grow organically
- For all potted plants in small to medium pots including shrubs, ornamentals, fruit trees, veggies and herbs*

KEY BENEFITS

- Certified for organic production
- Contains Jeffries Organic Compost*
- Provides plants with vital organic carbon
- Excellent drainage due to ideal soil structure minimising compaction in pots
- The composted organics component: absorbs and releases water, slowly releases nutrients, assists in nutrient retention; and suppresses the growth of plant pathogens.

MADE FROM

Organic material that has been through a controlled process of natural aerobic composting. Sources include home green bin, garden pruning and food organics. While every effort is made to screen out inorganic material, this product may contain an occasional fragment of plastic, metal or glass.

**Proudly made
from recycled
organics**

CERTIFICATIONS

- Australian Certified Organic

*this product is allowable for use on farms (or in facilities) certified to the Australian Certified Organic Standard.

Jeffries Organic Potting Soil*

APPLICATION

1. ensure pot has plenty of drainage holes and is well cleaned

- fill the pot half full with Jeffries Organic Potting Soil*

1

2. Place your plant in the centre

- gently burrowing it into the potting soil

2

3. Fill around the plant with more soil being careful not to compact it too tightly

- Leave a gap from the lip of the pot to allow for watering

3

4. Water in well

Note: Do not leave the pot sitting in a saucer of water as this may cause root-rot (unless specifically required for that plant)

Instead, place gravel or decorative pebbles on the saucer and sit the pot on top to allow for drainage

4

Typical Analysis

pH	7.0 - 7.5
Bulk density	0.55 - 0.65 tonne/m ³
Wettability	0.8 - 1.5 min

Water holding capacity

Jeffries Organic Potting Soil* has the capacity to store more water in the soil, than soil without compost. Increasing your soil's water holding capacity can reduce plant stress due to heat and evaporation during warm/hot periods.

Soil pH buffering

Jeffries Organic Potting Soil* works to buffer excessive pH fluctuations in soil pH which improves nutrient uptake and improves plant health.
